

ATTACK SURFACE MANAGEMENT

See what attackers see — before they do.

Isaphia is a continuous attack surface management platform that discovers, monitors, and prioritizes every internet-facing asset your organization owns — including the ones you forgot. Built for security teams, MSSPs, and consultants who need full external visibility without the operational overhead of running their own scanners.

PLATFORM CAPABILITIES

Asset Discovery

Subdomains, IPs, cloud, M&A.

Vulnerability Scanning

CVE detection & severity.

Cloud Discovery

AWS, Azure, GCP exposure.

Port & Service Scan

Open ports, banners, services.

SSL/TLS Monitoring

Cert expiry, weak ciphers.

Dark Web Monitoring

Leaked credentials & data.

Secret Detection

Exposed keys & tokens.

Tech Stack Inventory

Frameworks, versions, EOL.

Email Security

SPF, DKIM, DMARC posture.

Domain Security

DNS hygiene & hijack risk.

Web App Testing

Surface-level web findings.

Typosquat Detection

Phishing & lookalikes.

INTEGRATIONS & ENTERPRISE READINESS

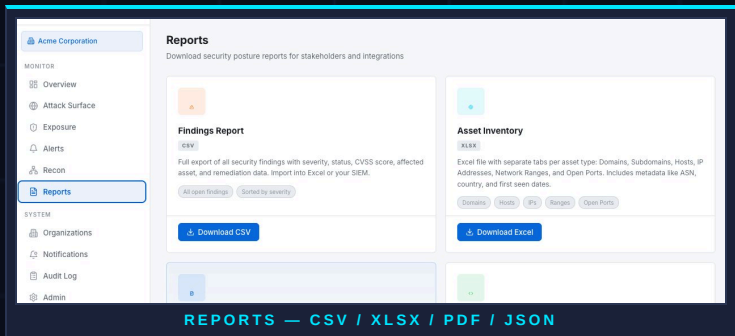

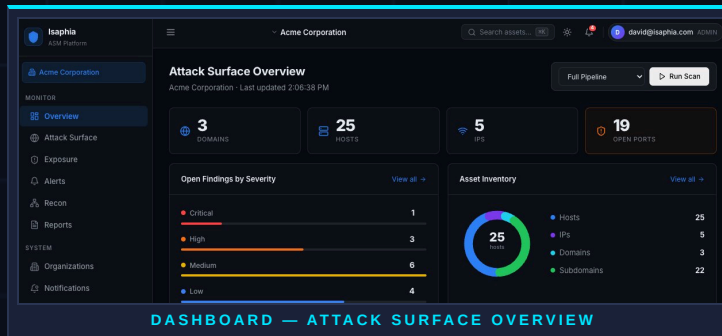

Integrations & Workflow

- SIEM: Splunk, QRadar, Sentinel, Elastic, Chronicle
- Ticketing: Jira, ServiceNow, Zendesk
- SSO via SAML 2.0 / OIDC (Okta, Azure AD, Google)
- Two-factor authentication (TOTP) enforced per role
- Notifications: email, Slack, Teams, webhook, SMS
- REST API + webhooks for full automation
- Immutable audit logs for compliance & forensics

Reporting & Exports

- Executive Report — board-ready risk posture & KPIs
- Inventory Report — full asset list with classification
- Findings Report — vulns with severity & remediation
- Scheduled or on-demand generation
- Formats: PDF, XLSX, CSV, JSON
- White-label branding available for partners
- Trend reporting and historical comparisons

SEE IT IN ACTION

DEPLOYMENT MODELS

SELF-SERVICE SAAS**Run it yourself.**

Direct dashboard access for your team. Configure scopes, run scans, review findings, export reports. Full RBAC, unlimited users. Ideal for in-house security teams.

MANAGED SERVICE**We monitor for you.**

Our team triages findings and escalates only what matters. Monthly executive briefings. Direct line to security analysts. Ideal for orgs without dedicated AppSec.
